

PROFILE

I'm Sneha Amujuri. Hello. I am an implementor, learner, and creative person. My slogan is "Make Things Happen".

I excel at programming. I've developed a lot of things and learned a lot. I have created many more projects and formed my own portfolio.

I've learned that the first step in writing code is to resolve the issue. Write the code after that. Code is similar to humour. It's horrible when you have to justify it.
